

Setting up your Wallet

Think of your digital wallet as your passport to the Siesta Billy lifestyle.

It's a secure app that stores your Billy Coins and NFTs, giving you access to exclusive events, rewards, product releases, and experiences. No crypto expertise required - we'll walk you through everything step by step.

Apollo Wallet simplifies multi-chain use.

1. Install Apollo Wallet

- **Recommended Option:** Chrome Extension (easiest for browser use) → Go to: <https://chromewebstore.google.com/detail/apollo-wallet/mnpnahmgchhkjphkkemhbnjedajbcbll> → Click "Add to Chrome" → Confirm installation.
- **Alternative:** Web Wallet → Visit <https://apollowallet.io/> → Click "Create A Wallet" or "Sign In With Seed Phrase".

2. Create or Import Your Wallet

- Follow the on-screen prompts to create a new wallet.
- **Backup your Secret Recovery Phrase** (12-24 words) immediately — write it down offline and store securely. Never share it.
- Set a strong password.

3. Add / Switch Networks

- Apollo Wallet should have **Apollo Mainnet** pre-configured or easy to add.
- **For Apollo Mainnet (required for NFTs):**
 - Switch to Apollo Mainnet (Chain ID: 62606, Currency: APOLLO).
 - Use <https://chainlist.org/chain/62606> if needed to add it quickly.

- **For BNB Smart Chain (required for tokens):**
 - Add/switch to BNB Smart Chain (Chain ID: 56, Currency: BNB).
- Always double-check the network before any transaction.

4. **Acquire Funds**

- **BNB** (for buying tokens + gas on BSC): Buy on Binance, Coinbase, etc., and send to your Apollo Wallet address **on BNB Smart Chain**.
- **APOLLO** (for NFT gas fees on Apollo Mainnet): Buy at (TBD via theAlley.io)
- Start with a small amount (~\$25) for fees.

For life help and community support, please visit <https://theAlley.io>

- Great for live help, announcements, and community support (e.g., "How do I switch networks in Apollo Wallet?").
